

Kat Razo

Software Engineer / Developer

Versatile software engineer who can learn any language or framework within two weeks.

My main experience is with OOP and procedural applications and websites that manipulate data, interface with web APIs, or have their own lite engine. I value Clean Code and efficient code with longevity in mind.

Work experience

9/2025 - Present

Muncie, IN

Development Apprentice @ The Digital Corps (Ball State University)

- Learn and apply advanced concepts in full stack web/software development including React, TypeScript, Docker, Node, and a lot more.
- Work with real university clients on an expansive array of real projects that service Ball State and the Muncie community.
- Attend weekly soft skills sessions focused on productivity and professionalism.
- Establish and fulfill my role as a developer in a large, multi-department company with all kinds of projects.

1/2024 - 12/2025

Muncie, IN

Teaching Assistant @ Ball State University

- In-class with students and available at office hours.
- Coordinate with professors to assist in times that work for them.
- Interact with a wide variety of students and vary my teaching style to cater to each and every one.
